SENATOR VOORHEES has introduced a bill in Congress to give pensions to ator Gray's remarks, indicating that no it will publish that fact. Its memall the federal soldiers in the war between the States, "at a minimum rate of \$12 a month," and says he "hopes to the process of arriving at a measure be able to have it passed." Some that would command 43 votes in the Northern democrats, with Presidential bees in their bonnets, are possessed of the idea that, irrespective of what they say or do, the South must, and will, support them, and that therefore all that is requisite for success is to secure enough Northern votes, and, in order to effect that object, they resort to such and the other? Yet we hear concesdemagogic tricks as that referred to. Unfortunately they have too good reason to rely upon the support of the Sou h, but the opposition of the G. A. THERE are savers and spenders in all countries, but there are more of the latter, according to population, in th s than in any other, and not unnaturally, for this being a new one, its labor is high and money is obtained easier here than in older ones. In the latter, the sad experience of many generations has Senate of the United States the odium taught the wise lesson of economy. It has long been said by intelligent observers that the waste of an Ameri. can, would support a foreign family. Such observers also know that abroadno matter how small the wages of a laborer may be, he lays by something every week, and that these weekly accumulations in the course of years form ever, that Senator Gorman will read to a snug little sum for the use of old age. Here it is different. It is eat, drink and be merry for the present week, and let the next one take care of itself; so that the last of Saturday night's wages is clean gone for ever by Monday, and the next week opens with bare pockets. But the lesson referred to must be learned here too, and will be in time, but not until after much suffering, that might be easily avoided.

Congress. The Senate proceedings yesterday were of a peculiar nature, in that the debate was carried on entirely by the democrats, save a brief speech by Senator Sherman and a question by Senator Aldrich. The principal speeches of the day were those of Senators Hill and Vest, though others contributed to the interest of the occasion. Senator Hill's position endorsing the President in emphatic terms was one of the most conspicuous incidents of the day. Senator Voorhees made something of a scene by getting angry at a remark made by Senator Hill, while Senators Cockrell and Pugh entered the discussion with some interrogations directed at Senators Hill and Vilas, which showed that they, too, felt the force of President Cleveland's condemnation of the Senate's course. Senator Vest took occasion to talk in plain terms in defense of the right of the Senate and House to manage its conference without execu-tive interference. He said "Mr. Cleve land was a big man, but the democratic party was greater than any one man. It had survived Jefferson, Madison and Jackson, and it would survive Grover Cleveland." Mr. Gray moved

that the Senate insist upon its amendments and consent to further conference. The action of Senator Vilas in preced ing his speech with a motion to strike out the one eighth differential on sugar was an additional sensation. The state ments of Senator Smith and Senator Blanchard were important as indicating that a change in the sugar schedulmight mean a loss of their votes, while Senator McCaffery stated decidedly that he would not vote for the bill i this change was made. Senator Gray vigorous speech was enlivened by brisk colloquy with Senator Hill. With out taking action on the proposition of Mr. Vilas to strike out the differential vote on refined sugar the exciting day's proceedings closed with an affirmative vote on the motion to adjourn over un til Monday. The speeches of Messrs. Smith, Vest, Gray, Callery and Blanch ard, announcing their intention of standing by the compromise tariff bill, is accepted as evidence of a determina tion on the part of the "conservatives to further resist the demands of the House of Representatives for a tariff re form measure. The new French torpedo boat Le Grandeur ran into the harbor at Ronlogne yesterday at a high rate of speed and was abandoned at once by crew. She had been partly burned and was filling with water, having col-lided with the big armored cruiser Jean Bart. After the collision she was headed for Boulogne. Fuel was piled on her fires until she was running 28 knots an hour. Her boiler plates grew red hot, the woodwork caught fire, and the flames spread rapidly. The twenty men manning the vessel fought the fire with desperation, despite their growing agony as the flames crept toward the magazine. Eventually the fire was checked, when but a few feet from the magazine, by the influx of water through the hole made by the Jean Bart.

A mass-meeting of 1,500 men was held at Ogden's Grove, Chicago, last night, and Debs was nominated for President of the United States amid great enthusiasm. The speakers were local labor men, and their remarks were all of one tenor. They eulogized Debs and denounced President Cleveland. The meeting declared itself as utterly opposed to the democratic and republican parties, and predicted a sweeping success for the populists in the next election.

The GAZETTE has informed the public that I have been discharged from further service at the Electric Light Works, but my side of of the Committee on Light has positively r desired to testify against the engineer of the works, and the chairman also. I take the method of laying the matter before the public and perhaps a higher authority than th chairman will give me a hearing One reason why the engineer desired my removal, and he has been working his maket for some time, is that he wanted a personal friend of his in my place. I further charge that through neglect (he going to sleep while on duty set of commutators was burned out, and other damage of a costly nature was sustained by the city, and the chairman knew it. It was also desirable that I should be removed from the works because I knew of violation rules around the works and was inclined to talk about them. I have witnesses who corroborate all I say, or will say when I and give me and my witnesses an opportunity to tell, under oath, what we know about them
